Dr J. Collis Browne's Chlorodyne

(Ex Army Medical Staff)

CAUTION—Vice-Chancellor Sir W. P. Wood stated that Dr. J. Collis Browne was undoubtedly the inventor of Chlorodyne; that the story of the de-

fendant, Freeman, being the inventor of Chlorodyne; that the story of the defendant, Freeman, being the inventor was deliberately untrue, which he regretted had been sworn to. Eminent hospital physicians of London stated that Dr. J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr. Browne's—See Times, July 12th 1864.

The Public, therefore, are cautioned against using any other than Dr J. Collis Browne's Chlorodyne.

As a remedy of general utility, we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to \$2y\$, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances ad infinitum of the extraordinary efficacy of DR. COLLIS BROWNE S CHLORODYNE in Duarrhoea, and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting or Pregnancy, and as a general sedative, that havploe are and over personal observation during many years. i full blast, and the bears, under the hopeful nfluences of the loan and the busy season, have opened a tremendous fire on the bulls who hold their ground with comparative facility, owing to the great scarcity of gold and the squeeze on those who sold short. This was, in fact, the first speenlative battle of the month and the bulls, it must be couessed, remained masters of the field, in spite of the slight decline in the premium; closing rates wore a fraction under opening prices. finally turned up with some elements and in numbers of some importance. The London bankers and the French 'artistas' are rocking Good business done to-day. cradle of this bearish speculation with the bright hopes of active wool shipments and of sovereigns shoveled into the holds of Lamport

prepared for the squall, and they were considerably reinforced by parties who were in haste to buy back what they had sold short.

It remains to be seen if the bears can coninue their attack on the bullish speculation on the same heavy scale of this morning's speculation. If they do the bulls are doomed although nobody anticipates a stiff fall in quo \$149,000; the market opened at 45, rose to 43.40 and 37, 35 5.40, fell to 44.80, and closed at 44.90, firm. Operations for the end of the month amounted to \$720,000; rates opened at 44.50, rose to 45, fell to 44, and closed pretty firm at 44.10. Nearly \$300,000 were sold for the end of November at 43½ to 43.

Fifty thousand were sold for the end of the ear at 42 and 42.20. Small amounts were sold for January and Fobruary at 42. Opera-tions during official hours amounted to \$1,224,000, the busiest day of the month up But for the fact that this was a kind of liquidation day, the premium would have fallen to a lower rate, but considerable amounts, that had been sold short since the first days of the month, fell duc, and this fact helped the bulls to a considerable extent. The bears operated with great vigor this morning and and much other produce. they had in their favor the bearish prospects of pext fortnight and the firm reaction through which the exchange market is passing extent, to the efflux of specie from this market. The searcity and high prices of gold are frightening takers out of the exchange mar-

ket, and rates are rising in consequence. Bills were offering to-day at  $46\frac{7}{8}$  and 47 d., but few takers even at the latter rate. The prospects of the market point to a steady rise in rates. Affairs in the produce markets are becoming daily more lively and the country is emerging slowly from the lethargy of winter. On the 17th our irrepressible friends, the French "artistas", will invade the markets in force and hasten the active reaction that is dawning Paper money is no longer so dawning. The rise in exchange, the renewed activity in produce, and rise in the premium on special gold, suffice to put a stop to the export of specie for some

time to come, and this is an immense relief to

the market.
